Lesson 6 STUDENT DATA LOG

What question am I trying to answer?

What type of data (information) will I collect?

How will I collect the information? (observation, measurement, tools?)

Bottle 1: Variable-

| Date | Observation or | Data collected |
|------|----------------|----------------|
|      | measurement    |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |

Bottle 2: Variable-

| Date | Observation or | Data collected |
|------|----------------|----------------|
|      | measurement    |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |
|      |                |                |
