

Synthesizing is putting information together and making something new.

Synthesizing is important because...

It helps me see things in a new way.

I use synthesizing when I...

Have lots and lots of information.

Synthesizing

When I synthesize, I...

- Think about **what is important** from each source.
- **Compare** and **contrast** that information.
- Think about **what I know** about this topic.
- **Combine all the information** together in a new way.
